

Zinc Audit from Konetic, the e-recruitment specialist

- Are you sending out paper forms to survey your hospitals or units?
- Are you unable to produce management information reports quickly and easily?
- Do your clinicians complain that the audit process is too long or complicated?

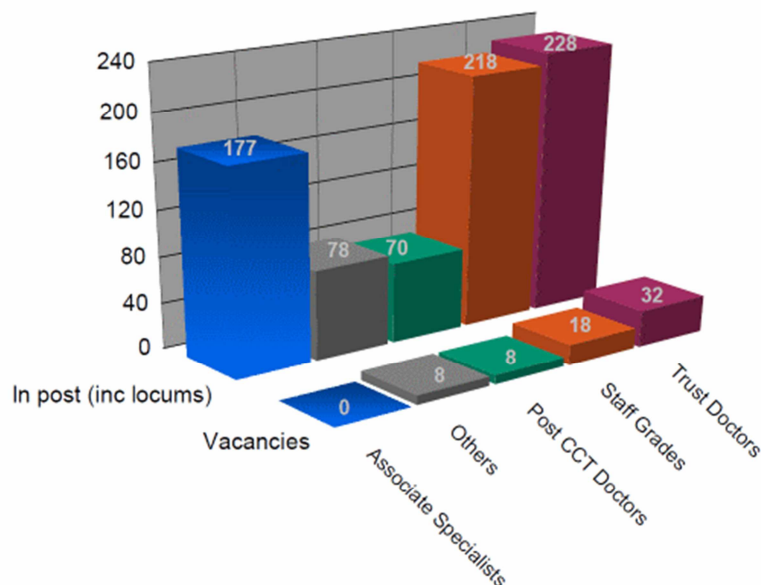

Zinc Audit is the solution to these problems, and more. We consulted with leading medical specialties to build a light-weight, easy to configure web portal, aiding the collection of workforce census or clinical audit data from hospitals, medical services and units.

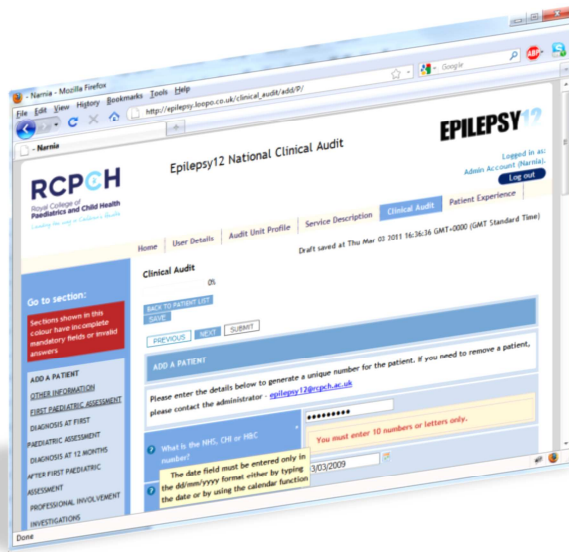

Key advantages of running your audit or census process with Zinc Audit

- 100% secure data collection
- Easily configure your survey questions in an hour or less
- User friendly and intuitive for clinicians to use
- Entirely web-based software – no desktop installs or updates to manage
- Backed by Konetic’s proven “total service” support

“Simple and straightforward”

RCOG Census Dept.

Clinician's portal

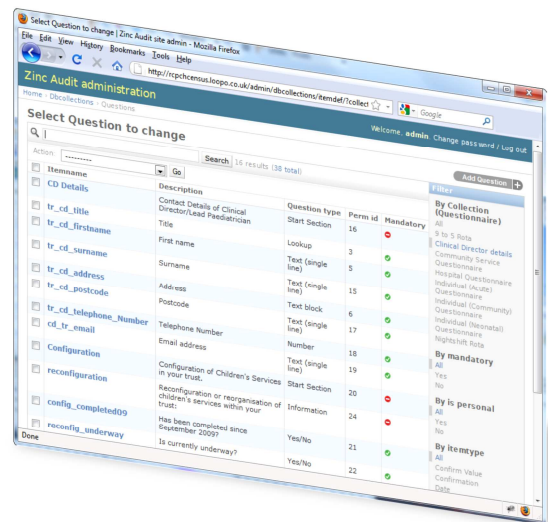

- ✓ Secure, segregated access
- ✓ Validate and save data quickly
- ✓ Contextual help in questionnaires
